

ATTACHMENT 2

LIST OF ADDITIONAL INFORMATION AND EXAMPLE INTERVENTIONS

This attachment is provided to assist Applicants' understanding of the types of interventions that other First 5 Commissions are funding.

These examples are provided **ONLY** to illustrate the types of interventions that could be implemented in response to the RFP. This is in no way intended to be a list of proposals the First 5 Merced County Commission would consider funding, rather a list of examples of ways other communities have proposed systems-level change that impacts their particular community. Applicants can propose any intervention of their choosing as long as it relates to the First 5 Merced County's Strong Families Priority Area and meets First 5 objectives. This must be very clearly identified in the proposal.

County	Effort	Description
First 5 San Mateo	Oral Health Strategic Planning Process	Development of a comprehensive San Mateo County Oral Health Strategic Plan to explore collaborative solutions to the lack of access to oral health services. The plan calls for co-location of oral health services at WIC sites, early learning programs, and TK/K campuses. It calls for primary care providers to apply fluoride varnish and provide oral health education and referrals as part of well-child visits, and will build the capacity of oral health care providers to serve low income pregnant women, infants, and young children.
First 5 Humboldt	0-8 Mental Health Collaborative	Ongoing convening of service providers that work collaboratively and work from a common trauma-informed lens. In the 2015-2016 fiscal year, over 400 providers were trained through the collaborative's sponsored trainings. Another intended result was to increase the number of service providers in Humboldt County with California Infant-Family Early Childhood Mental Health (IFECMH) certification. The initial community impact is better trained service providers working collaboratively to increase the positive impact on children and families. The long term impact will be a change in the service delivery system.
First 5 Sacramento	Sacramento County Medi-Cal Advisory Committee	The MCDAC commissions studies and works regularly to identify gaps in service delivery of 0-5 oral health services. Since its inception, access to quality dental care has improved for Sacramento County children up to 40%.

<p>First 5 Contra Costa</p>	<p>Family Economic Security Partnership</p>	<p>The Family Economic Security Partnership is a coalition of 40 nonprofit, public, and private agencies that collaborate to increase income and build assets of low-income families. FESP increases awareness about the root causes of poverty and increases the engagement of direct service providers in advocacy on needed structural and systemic change. FESP participates in coalitions including Ensuring Opportunity Campaign to End Poverty in Contra Costa County and the CalFresh Working Group.</p>
<p>First 5 Sacramento</p>	<p>Steering Committee on Reduction of African American Child Deaths</p>	<p>The Steering Committee on Reduction of African American Child Deaths is funded by First 5 Sacramento to work with African American service providers and policymakers. The intended result was to raise awareness and seek funding support to address the problem of the disproportionate African American child mortality in Sacramento County.</p>
